The University of California Institute for Mexico and the United States (UC MEXUS), Mexico’s National Commission for Science and Technology (CONACYT), and the One Health Center of the UC Global Health Institute announce a one-day symposium to highlight research advances and insights for human health and the environment as related to toxic exposure and contamination in Mexico and the United States. The symposium will convene experts from the University of California and Mexico with binational research ties and with perspectives from the medical, health, and environmental sciences.

April 5, 2011
UC Riverside, HUB Room 355

Registration 8:00 a.m. Symposium: 8:30 a.m.
Preregistration is recommended.

The symposium is free and open to the public. Luncheon and evening reception with preregistration. For additional information, please contact Andrea Kaus, UC MEXUS, 951-827-3586, andrea.kaus@ucr.edu, or consult the website at ucmexus.ucr.edu.

“Today we are concerned with a different kind of hazard that lurks in our environment – a hazard we ourselves have introduced into our world as our modern way of life has evolved.”
-Rachel Carson, Silent Spring, 1962
