The University of California Institute for Mexico and the United States

Funding Opportunities — 2017
The purpose of the UC-Mexico Initiative is to create a sustained, strategic and equal partnership between the UC and institutions in Mexico to address common issues and educate our next generation of leaders. It provides an opportunity to think broadly and to develop strategies for a robust and enduring relationship that encompasses student and faculty exchanges, celebration of our shared heritage and populations, and research and scholarly activity that solves problems and advances knowledge on issues of mutual importance. The Initiative focuses on key program areas of interest to both the US and Mexico: arts and cultures, education, energy, environment, and health.

Every UC campus has programs on Mexico, ranging from vibrant centers to individual faculty research collaborations to Education Abroad. The Initiative brings together these many activities to provide strategic direction and to create synergies among current efforts. In addition, the Initiative provides a mechanism to develop new programs and partnerships, involving academia, government, corporations and foundations on both sides of the border. A key goal is to leverage existing funding to stimulate additional investment.
The University of California Institute for Mexico and the United States (UC MEXUS) was established in 1980 to identify, focus, and augment the resources of the ten campuses of the University as they relate to research, education, creative activity, and public service concerning Mexico and people of Mexican origin.
Areas of Interest

“In Mexico, About Mexico, With Mexico”

**UC-MEXICO COLLABORATION** between U.S. and Mexican scientists in all disciplines, including the basic and applied sciences, humanities, and the arts

**MEXICAN STUDIES** as related to Mexican history, society, politics, culture, arts, and economy

**U.S.-MEXICO RELATIONS** in contemporary and historical context, in terms of the economic, political, demographic, and cultural interactions between Mexico and the United States

**LATINO STUDIES** related to the history, society, culture, and condition of Mexican-origin populations in the context of American society and institutions, including their interactions with other U.S. immigrant groups

**CRITICAL ISSUES** in terms of urgent public policy or academic topics affecting Mexico, the United States and Mexico, the U.S.-Mexico relationship, or Mexican-origin populations in the United States
2017 Call for Proposals

Grant Programs

Collaborative Grants for Teams of UC and Mexican Researchers

UC MEXUS Dissertation Research Grants for UC Graduate Students

UC MEXUS Small Grants for UC Faculty, Graduate Students, and Postdocs

Fellowship Programs

Doctoral Fellowships for Mexican students pursuing their doctoral degrees at UC campuses

Postdoctoral Research Fellowships for Mexican Ph.D.s at UC campuses and UC Ph.D.s at Mexican academic institutions

UC MEXUS Resident Scholar for short- to long-term stays at UC MEXUS

Grants for UC Faculty

UC MEXUS-CONACYT Collaborative Research Grants
Proposal Deadline: March 6, 2017

- Annual competition – all disciplines except the arts
- Open to UC-Mexico research pairs or teams
- $25,000 maximum over a 1.5 year project period
- Seed funding
- Selection criteria: program fit, quality of the collaboration, quality of the research, significance

For additional information, please consult the UC MEXUS website at: www.ucmexus.ucr.edu
Grants for UC Faculty

UC MEXUS Small Grants

- Monthly competitions – first Monday of every month
- One-time, short-term, seed or pre-seed projects in all disciplines
- $1,500 maximum over a 1 year project period
- Selection criteria: program fit, quality, potential to develop beyond the project period, significance

For additional information, please consult the UC MEXUS website at: www.ucmexus.ucr.edu
Grants for UC Graduate Students

UC MEXUS Dissertation Research Grants

Next Proposal Deadline: early September, 2017

- Annual competition
- For UC Ph.D. or MFA candidates
- $12,000 maximum over a two year project period
- Selection criteria: program fit, research quality, intellectual development, advisor(s) support, significance to the field

For additional information, please consult the UC MEXUS website at: www.ucmexus.ucr.edu
Grants for UC Graduate Students

UC MEXUS Small Grants for UC Graduate Students and Postdoctoral Researchers

- Monthly competitions – first Monday of every month
- For UC graduate students or postdoctoral fellows
- One-time, short-term, non-dissertation projects
- $1,500 maximum over a 6 month project period
- Selection criteria: program fit, quality, contribution to applicant’s academic development

For additional information, please consult the UC MEXUS website at: www.ucmexus.ucr.edu

Since the program began in 1998, has supported 445 students at the University of California.

Provides up to 5 years of funding for doctoral studies at any UC campus. Support includes payment of non-resident tuition and fees, a small stipend, and nominal support towards health insurance.

For Mexican students doing doctoral studies at UC campuses. (In some cases, CONACYT provides funding for Master’s level studies.)

Funds doctoral study in all academic disciplines except the Arts.

Students apply to UC campuses/departments and to CONACYT. Application process administered by CONACYT.

Very high award rate for applicants with UC acceptance (provisional).

UC MEXUS-CONACYT Doctoral Fellowship

UCI Graduate Departments/Programs that have hosted UC MEXUS-CONACYT Doctoral Fellows include:

- Social Ecology
- Mechanical & Aerospace Engineering
- Informatics
- Economics
- Cognitive Sciences
- Computer Science
- History
- Mathematics
- Spanish & Portuguese
- Ecology & Evolutionary Biology
- Planning, Policy & Design
Up to 18 fellowships are awarded each year, with a preferred even split between UC and Mexican postdoctoral scholars. (Possible second year continuation.)

Mexican Ph.D.s may apply for full-time residencies at a UC campus and be hosted by UC faculty member or researcher. UC Ph.D.s may apply for full-time residencies at Mexican research institutions and be hosted by a Mexican faculty member or researchers.

Postdoctoral scholars receive a minimum of $46,677 and maximum of $52,156 for up to 12 months, health insurance at the HMO level, and benefits.

Applicants must earn their Ph.D. by April 21, 2017.

Can be submitted jointly with a UC MEXUS-CONACYT Collaborative Grant application.

Deadline to apply: March 6, 2017
UC MEXUS-CONACYT

- UCSF: 3
For graduate students, recent PhDs, and visiting faculty at “critical junctures” in their academic careers.

Program provides shared office space at UC MEXUS as well as access to a computer, phone and the UCR Libraries.

Scholars must be self-supporting (may be eligible for a small research allowance).

May apply to the program at any time, ideally as early as possible. 8 spaces available.

See UC MEXUS website for details or contact me directly at wendyd@ucr.edu.

UC MEXUS - CONACYT
Postdoctoral Research Fellowships
for Mexican Ph.D.s at University of California Campuses
and for UC Ph.D.s at Mexican Institutions

2017-2018

Deadline for Receipt of Proposals: March 6, 2017

A program established under the 1997 UC-CONACYT Agreement of Cooperation in Higher Education and Research

The University of California Institute for Mexico and the United States (UC MEXUS) and Mexico’s National Council for Science and Technology (CONACYT) are pleased to announce a joint program to support postdoctoral researchers at the University of California or at Mexican institutions of higher education or research.

The primary objective of the program is to advance academic scholarship by emerging Mexican researchers and UC scientists and scholars in the early stages of their careers, after obtaining their Ph.D. In addition, the program seeks to support existing or developing binational academic networks through collaborative research projects between UC and Mexican faculty and institutions.

In keeping with these goals, postdoctoral applicants will be considered who will be actively participating in a research project or training program at the host UC campus or Mexican institution, with an emphasis on using the stay to advance their own academic and professional development as well as to solidify future binational research ties and networks. Applicants are encouraged to submit their proposed stay with projects submitted to the UC-MEXUS-CONACYT Collaborative Grant Program Competition.* The program also seeks to support projects that include matching funds, either from the host campus or institutions or from other funding sources.

* See below for the call for proposals and participating institutions.

SCR 43: Latino Studies
UC Policy on Eligibility to Submit Proposals
How to look for other sources of funding
UC Campus Contracts & Grants/Research Offices

Updated on 09/09/16
Proposal Writing

Be aware of internal campus procedures and deadlines from the UCI Office of Research (824-4768) and the UCI Graduate Division (824-4611). Their deadlines may be before ours!

Keep the text and format simple, clean, and short. Make it visually easy for the reviewers to read and understand.

Write the proposal for the specific program. Cutting and pasting from other proposals takes away from overall coherence.

Describe your research questions, goals, and methods clearly for a committee of diverse expertise. That is, let the reviewers know what you are going to do and how you will do it.

Let the reviewers know why your project is significant. Does it pass your own internal “so what?” test and can you convey that in the proposal?
Proposal Writing

Include a detailed description of any current or potential collaboration with researchers in Mexico and/or the fellowship host involvement.

Outline each major participant’s role in the project. Big names are great, but reviewers want to know if they are truly involved.

The programs are intended for seed funding and academic development, so include some discussion of long-term plans, academic or institutional impact, and potential future funding.

Let reviewers know about any student training or additional academic participation.

Have a colleague from a similar discipline read your proposal before you submit it.
Why are some proposals funded and others not?

**Appropriateness to the program**
Quality of research is important **AND** academic development:
- Are there clear and likely benefits to the proposed postdoctoral stay?
- Does the applicant plan to take advantage of learning opportunities at the host institution?
- To what extent is the proposed stay necessary to the applicant’s career at this point in time?

**Qualifications of the applicant and host**
- Does the applicant have the potential to succeed at the proposed stay?
- Fit, fit, fit between applicant and host/host department and potential gain.
- Does the host seem committed to actively overseeing this postdoctoral researcher’s project? (Host letter is critical.)
- Not wild about cogs in the machine.

**Quality of the proposal**

**Significance of the work**
Thank you

For additional information about UC MEXUS programs consult the UC MEXUS website at ucmexus.ucr.edu

“UC MEXUS is a critical program that facilitates building transnational partnerships and increasing the knowledge base about Latinos on both sides of the border.”

“I consider UCMEXUS [to have] all the programs . . . necessary to start and continue in a collaboration with UC scientists of the highest level.”

“Your programs are great!”
